CHATBOT

AGENT : Flight Booking

Submitted by:
K.Bhavani Prasad
Roll no: 21MBMA76
MBA(General)

Level 1- getting started

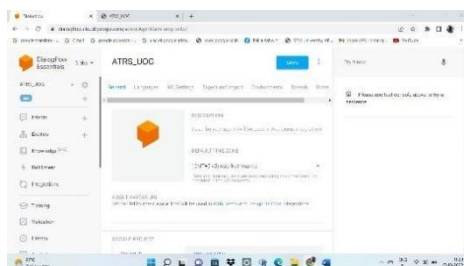

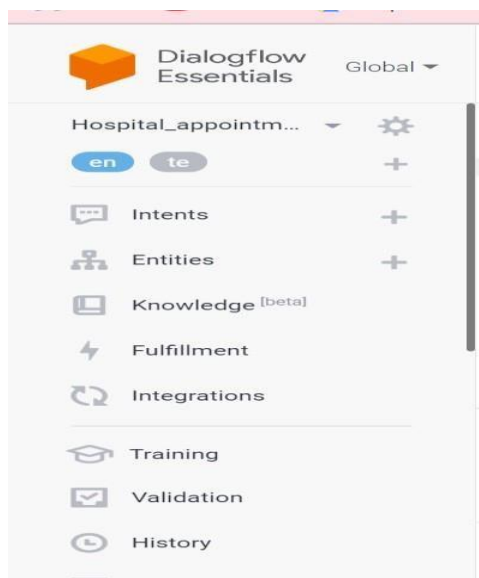

Step 1: getting set up with a Dialog Flow account

1. Go to <https://dialogflow.com/>
2. Click on “go to console” in the top right corner
3. Login with a Gmail account when prompted

Step 2: Creating an agent

4. Start off by clicking “creating an agent” in the column menu to your left
5. Give your bot name!” flight booking”
6. Be sure to select time zone and language required
7. Click on create

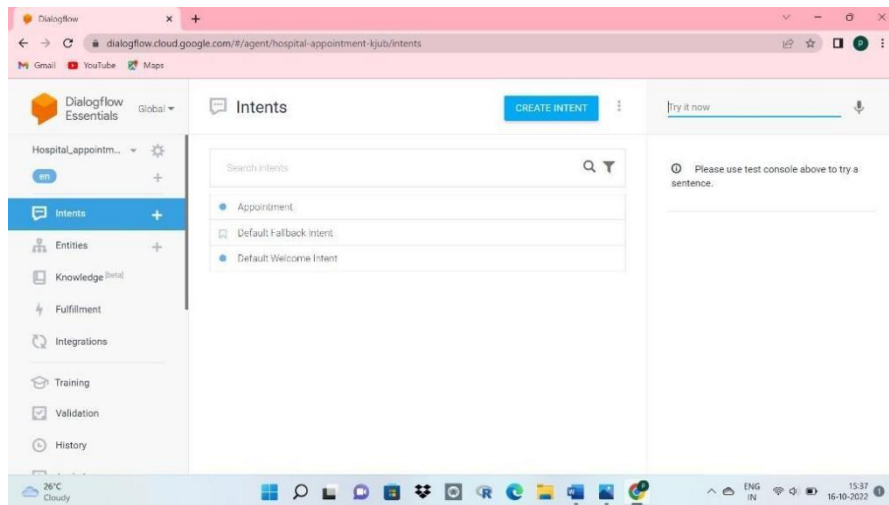

Congratulations you have created your first agent. Once the system recognizes it. Will see columnmenu expands

Level 2: Bot development

Step 1: checking out the present intents

This is just telling the bot what to do when welcoming someone or when the bot doesn't know the answer to their question. "Click on default welcome intent"

Scroll to the "training phrases" section .

Create new intents

1. To create new intent click on "+"
2. Lets develop some queries
 - A.) I want to book a flight
 - B.) Book flight

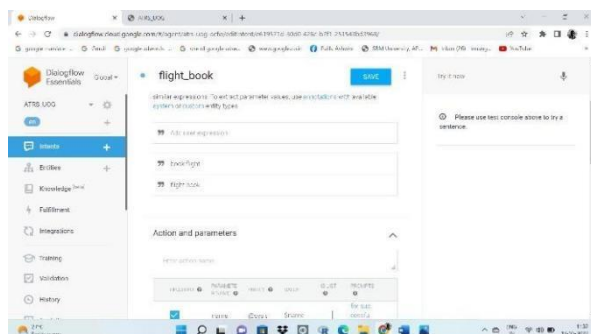

We'll create intents for each of these question types. Then feed in the appropriate expressions and responses.

Here is the example,

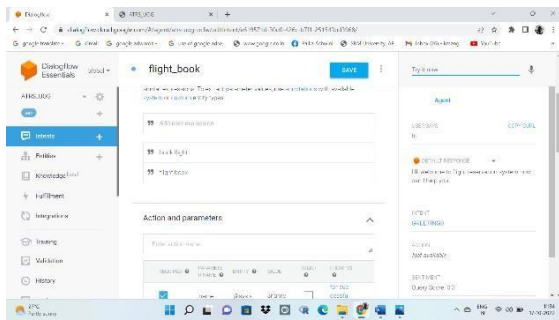

Expressions-new intent

After this click on save to save our intent and responses

Here we can try how it works

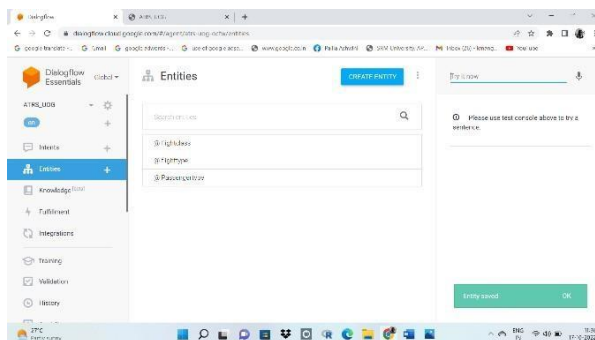

Level3: Entities, Actions,Parameter

Step 1: creating entities

Name of the entities

Example: flight class

Economy, first, business

Step 2: Creating action,parameters

1. Name of the parameters

Example: Name

2. Enter the entity that created

Start with the “@”

Ex: @sys. Person

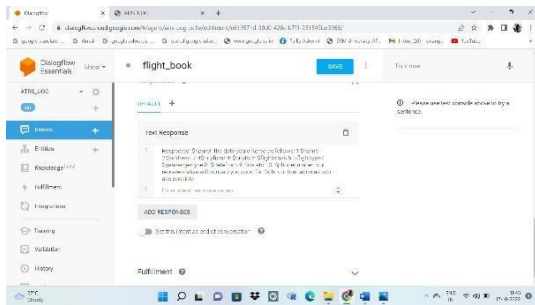

3. Enter the corresponding

“Value” starting with “\$”

Ex: \$name

4. Check the required box

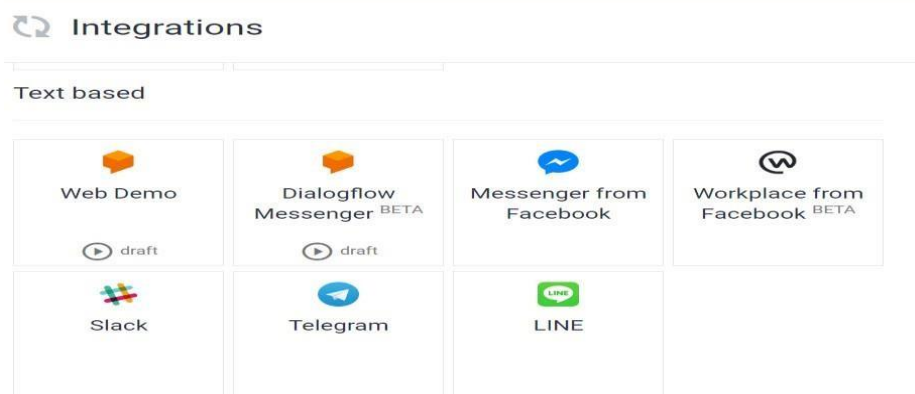

“To Enter the Prompts”

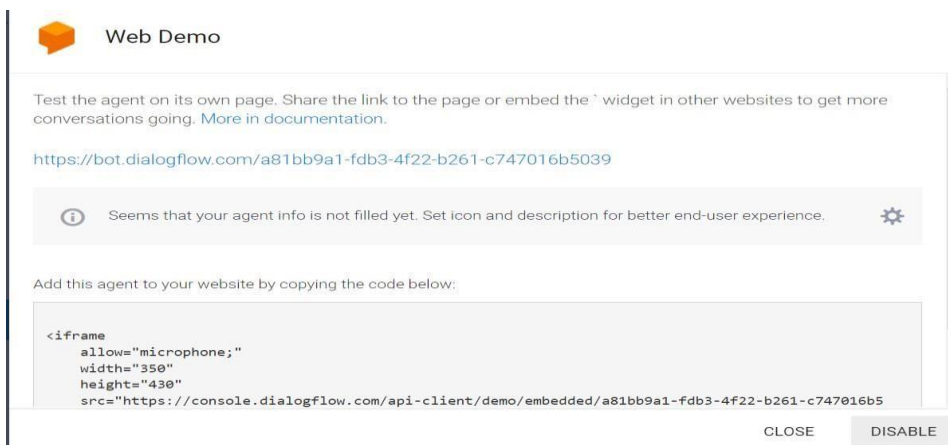

Level 4: Integration

Actual chatbot deployment on platforms like our websites etc. is a complicated procedure that required publishing the bot. but we can still get an idea of how the chatbot would appear when functional here's how

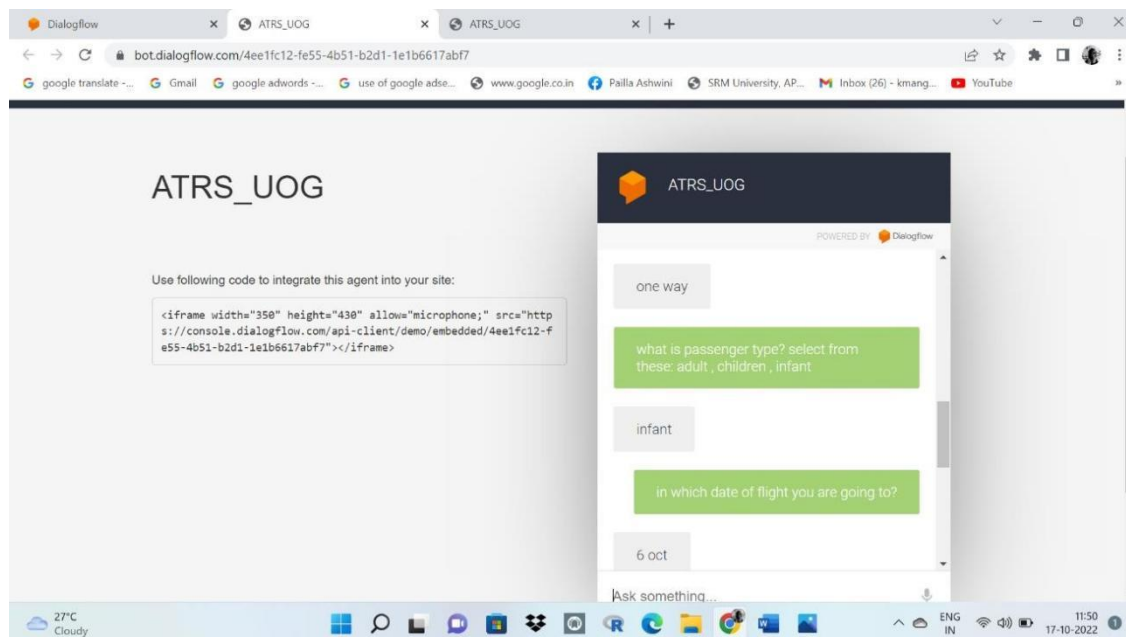

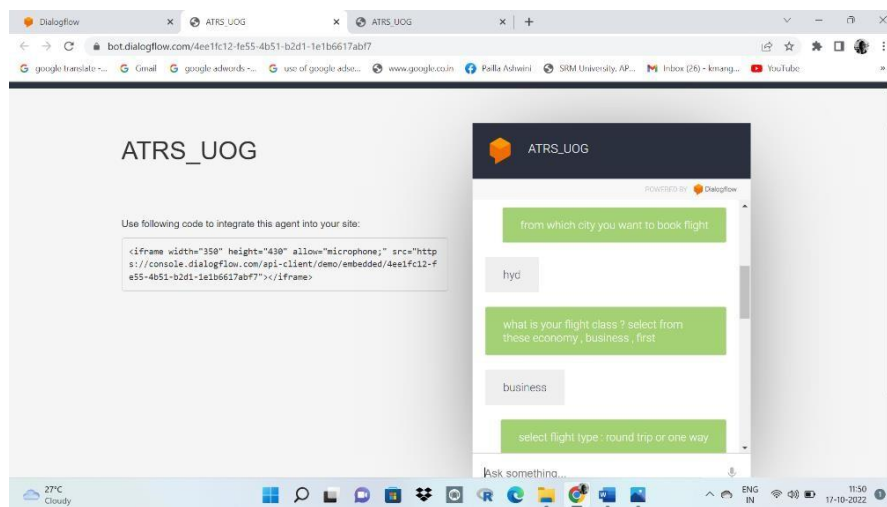

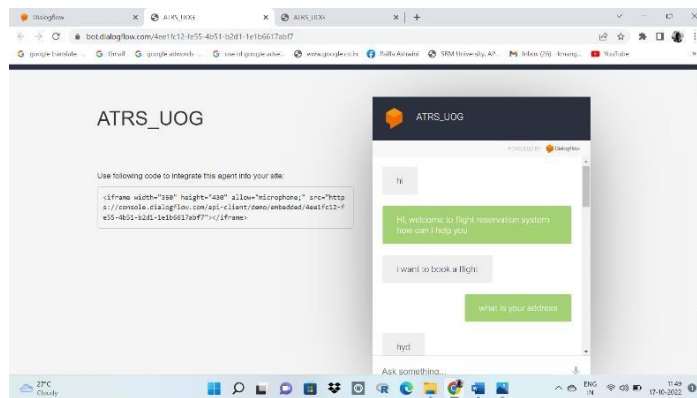

1. Navigate to the "integration" section in the left column
2. Toggle "web demo" on, then click to enter

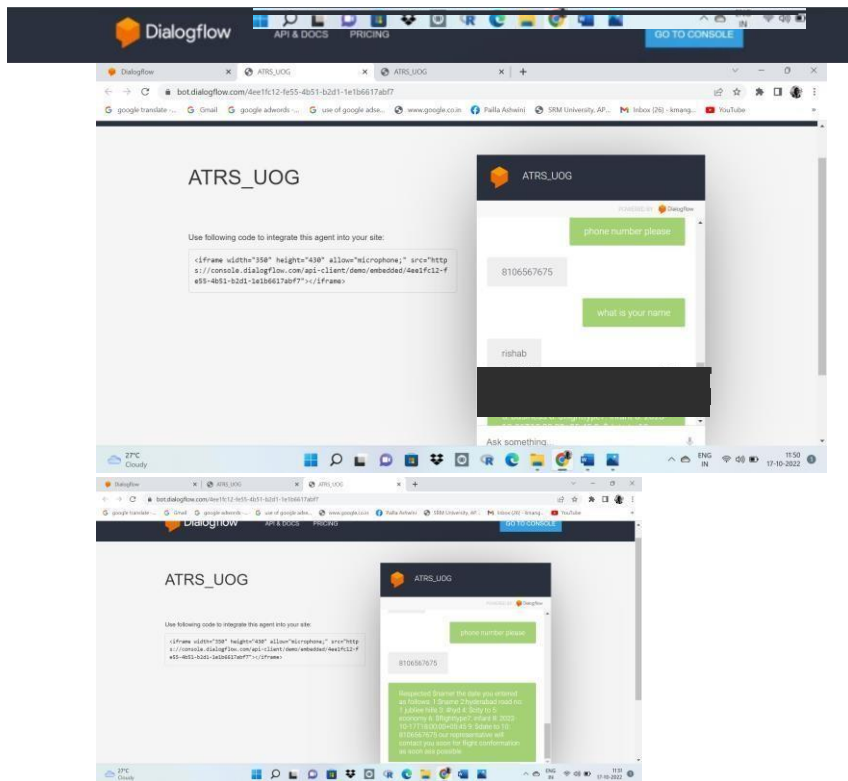

Click the URL

Here how our flight booking bot has gotten:

It is the link to access this flight booking chatbot :
